17 Edwin Avenue,
LAKE CONJOLA,
N.S.W., 2539.

Tuesday, April 22, 2008

Mr. Kevin Brown,
Contractor's Project Manager,
Ledonne Constructions Pty. Ltd.,
P.O. Box 142,
BLAKEHURST,
N.S.W., 2221.

Dear Mr. Brown,

My property has recently been connected to the new Sewerage System in the Lake Conjola area and I just want to compliment you on the high standard of the employees of yours that it has been my privilege to meet in the course of their duties.

Two of your Staff in particular are worthy of mention, namely your Foreman, Mr. Danny O'Connor, and one of his men, Mr. Craig Butler!

Being almost 90 years of age I have really appreciated everything that your Company in general and these two gentlemen in particular have done to help me - not only in the installation and connection of my property with the new system in the shortest possible time but, as soon as that first hurdle had been overcome, in the filling-in of the two original Septic Tanks.

With Mr. Danny O'Connor's co-operation and under his supervision - and after the completion of the filling-in of the original Septic Tanks by Mr. Butler - I was privileged and so grateful to see Mr. Craig Butler dress the subject area with top soil and grass seed, and so wonderful a job has the latter done that it now would be difficult to even visualise, let alone recognise, that the vast amount of work which in the first place necessitated the removal of rock to install the original Sewer Pump Unit, and then the filling-in of original space occupied by the two Tanks has been achieved and the land undergone such a tremendous change yet now is so presentable!!!!!!

Mr. Brown, you are to be congratulated in selecting such wonderful men to work for your Company and I am confident that many of our Lake Conjola residents share my sentiments and gratitude for a job really well done! Thank you so much!!!!

Yours very sincerely and gratefully,

John Wall
